

Embedded Wine Cabinet Wardrobe Cabinet Line Light Display Atmosphere Shelf Light Strip

Our Product Introduction

Basic Information

- Place of Origin: SHENZHEN CHINA
- Brand Name: YSENLED
- Certification: CE ROHS LVD EMS
- Model Number: YS-R120X2835RAF3
- Minimum Order Quantity: 10
- Price: Negotiable
- Packaging Details: 10*1000*20
- Delivery Time: 2DAYS
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100,000 meters per week

Product Specification

- Light Source: LED
- Processing Performance: Easy To Cut, Drill, Bend
- Power: 24W
- Lifetime: 50,000 Hours
- Lumen: 50-55LM/ CRI 85
- Led Chips: High-power
- Cct: 2800-7500K
- Safety Certifications: CE, RoHS, Etc.
- Led Chip: Smd5730
- Width: 10mm
- Warranty: 2years, 1 Year
- Voltage: 12V
- Materials: High-quality Aluminum Alloy
- Led Qty: 600pcs/ Roll
- Lamp Power: 14.4W/M, 12W/M, 57.6W/M, 60W

Product Description

Shelf lights, embedded wine cabinets, wardrobes, induction light strips, cabinet line lights, display cabinets, LED cabinet atmosphere light strips are a type of lighting products designed for home decoration and lighting. They not only have beautiful appearance, but also provide soft and uniform lighting effects, adding a warm atmosphere to furniture such as wine cabinets, wardrobes, and cabinets. The following is a detailed introduction to this type of product:

1. Product Overview

Definition: Shelf lights, embedded wine cabinets, wardrobes, induction light strips, cabinet line lights, display cabinets, LED cabinet atmosphere light strips, are LED lighting products that integrate lighting, decoration, and induction functions. It is usually installed under or on the side of the shelves of furniture such as wine cabinets, wardrobes, and cabinets, and achieves a hidden and elegant lighting effect through embedded installation or slot-free installation.

Material: The product shell is mostly made of high-quality aluminum alloy or plastic, and the light strip uses high-brightness LED chips, which are energy-saving, environmentally friendly, and long-life.

Function: In addition to basic lighting functions, many products also have intelligent control functions such as human body sensing and hand scanning sensing, which can automatically switch lights according to human activities, improving the convenience and fun of use.

2. Product Features

Embedded design: The product adopts embedded installation, which can be perfectly integrated into the interior of the furniture without taking up extra space, while keeping the appearance of the furniture neat and beautiful.

Intelligent sensing: Some products are equipped with human body sensing or hand scanning sensing functions, which can automatically sense human activities and control the switch of lights to achieve intelligent lighting experience.

Uniform lighting: The light emitted by the LED light strip is soft and uniform, which can illuminate the interior space of the furniture and make the display of items clearer and more beautiful.

Energy saving and environmental protection: LED lamps have the characteristics of low power consumption, high brightness, and long life, which are more energy-saving and environmentally friendly than traditional lamps.

Diversified choices: There are a variety of sizes, colors, color temperatures (such as warm light 3000K, neutral light 4000K, white light 6000K, etc.) and power products available on the market to meet the needs of different consumers.

3. Application scenarios

This type of product is widely used in the field of home decoration, especially the lighting and decoration of furniture such as wine cabinets, wardrobes, and cabinets. Through embedded installation and intelligent control functions, they can provide soft and uniform lighting effects for the interior space of furniture, while creating a warm and comfortable home atmosphere.

4. Purchase suggestions

Consider the size and layout of furniture: When purchasing, you need to choose the appropriate length and installation method of the light strip according to the size and layout of the furniture.

Focus on product quality and performance: Choose well-known brands and high-quality products to ensure that the brightness, color temperature, service life and other performance of the lamps meet the requirements.

Consider intelligent control functions: If the budget allows and there is a demand for intelligent control, you can choose products with intelligent control functions such as human body sensing or hand scanning sensing.

Pay attention to installation and maintenance: During installation and use, it is necessary to operate and maintain according to the product manual to ensure the normal operation and service life of the lamps.

5. Market status

With the popularization of the concept of smart home and the improvement of consumers' requirements for home lighting quality, laminate lights, embedded wine cabinets, wardrobe induction light strips, cabinet line lights, display cabinets, LED cabinet atmosphere light strips are becoming more and more popular in the market. Major brands have launched new products to meet the diverse needs of consumers, and market competition is becoming increasingly fierce. At the same time, with the advancement of technology and the reduction of costs, the cost performance of such products will continue to improve.
